

Installation guide for the SiteVision Siteimprove plugin

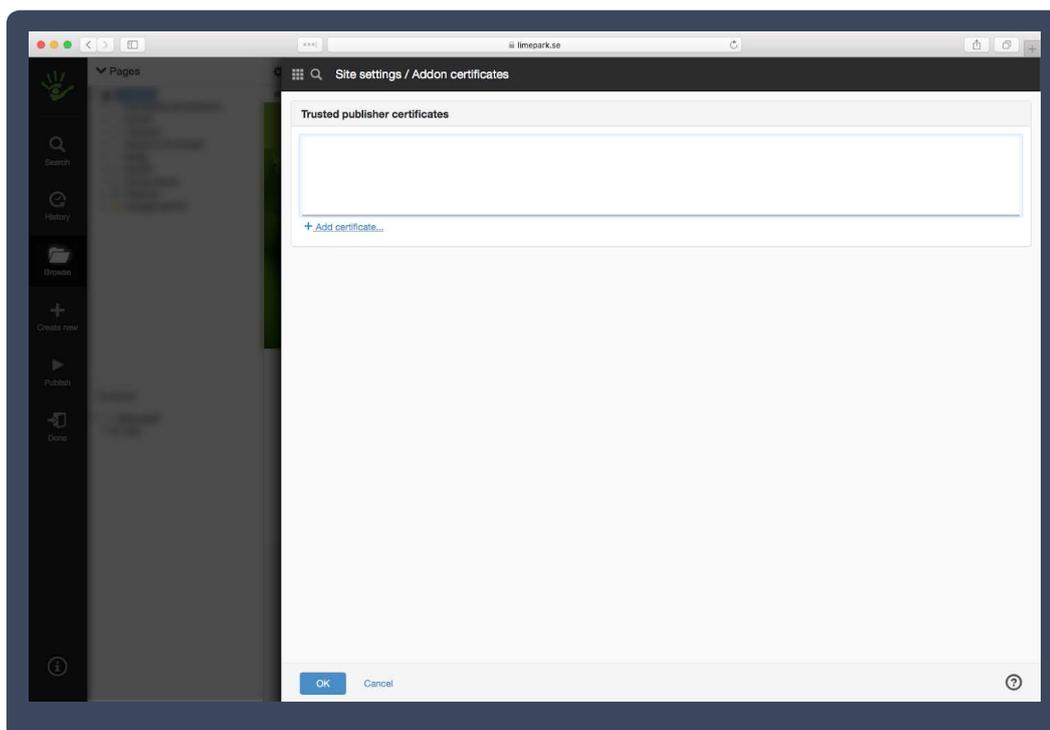

Guide

Install developer certificate

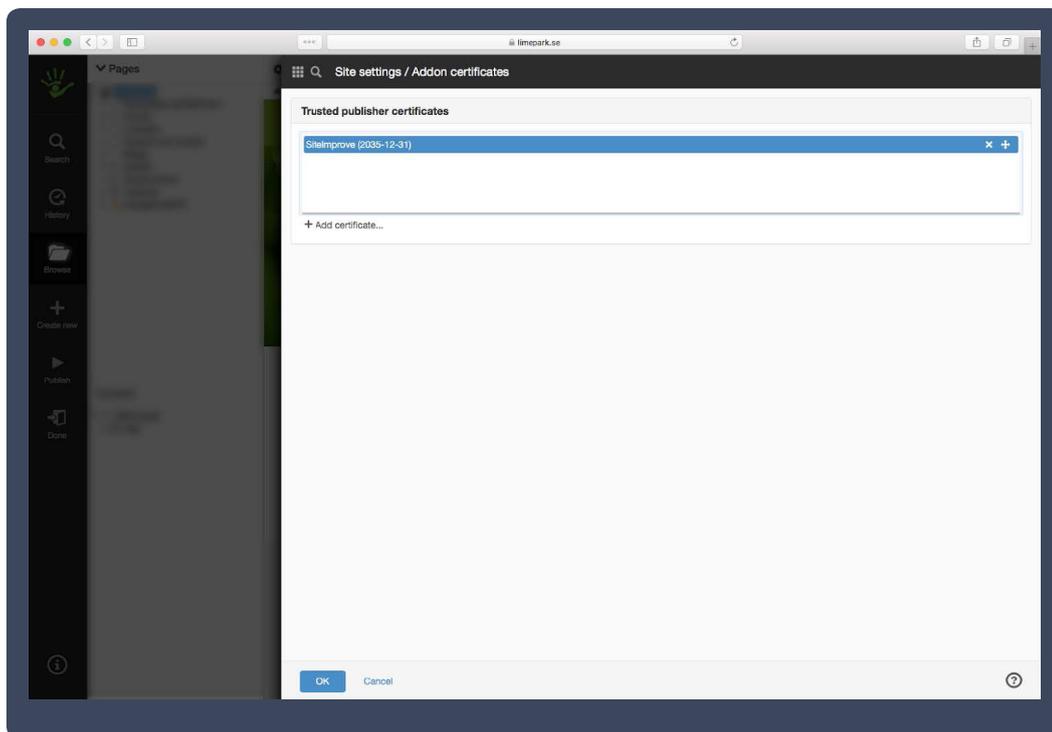

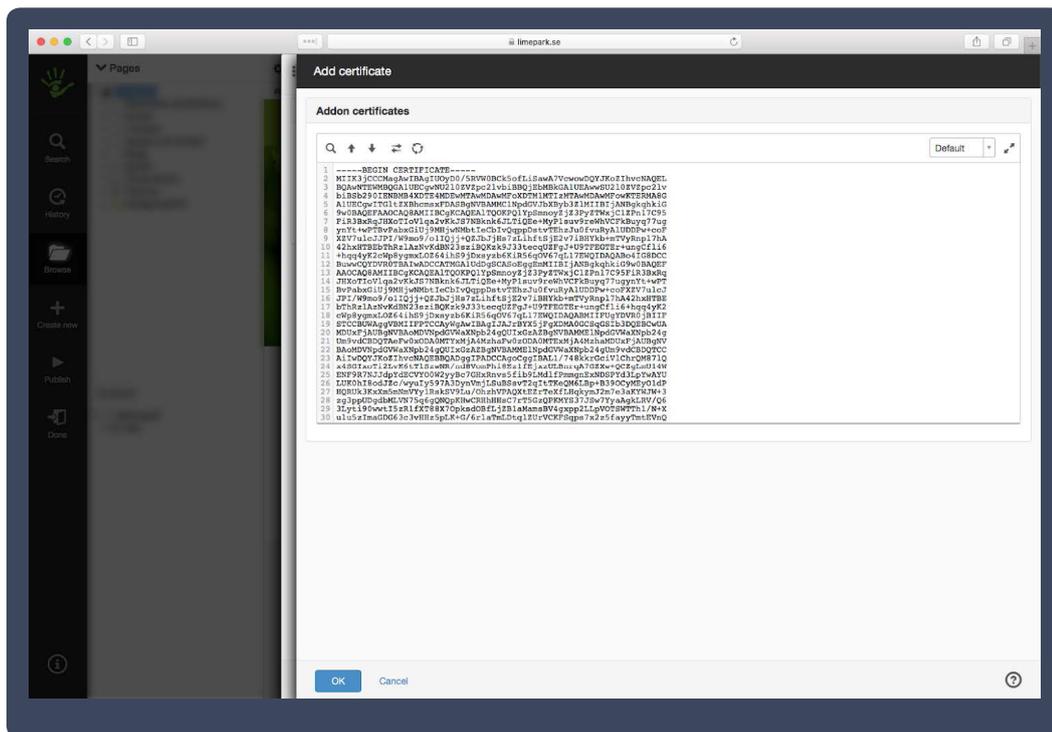

Open “Site settings” and enter the “Addon certificates” panel.

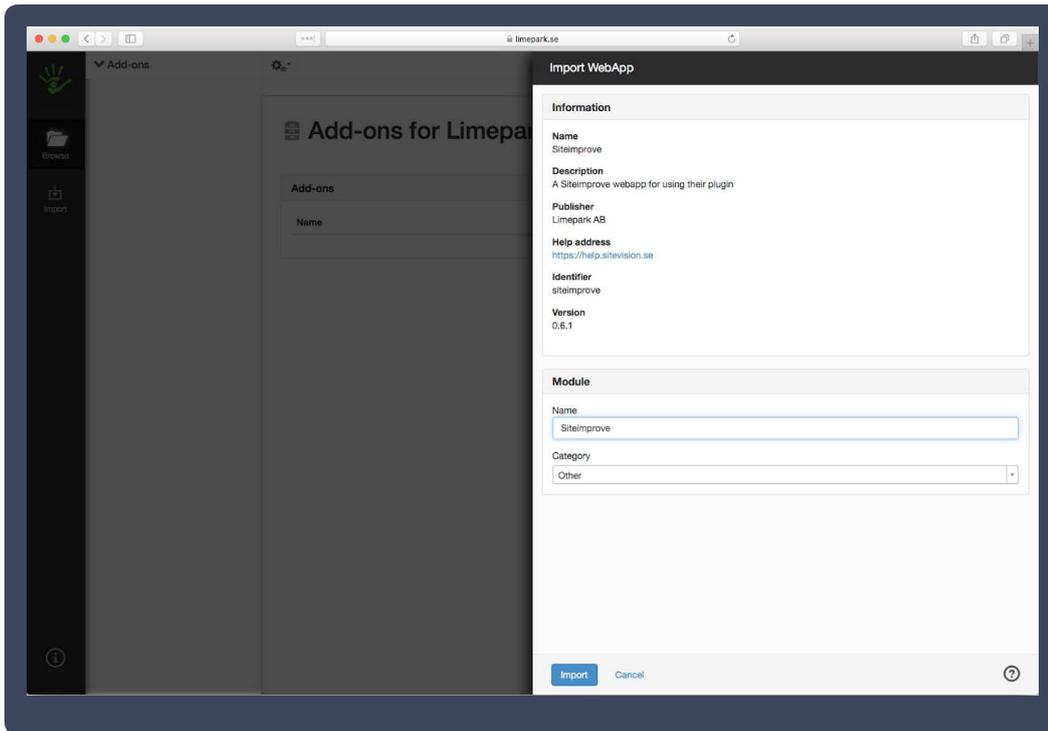

Press the button “Add certificate” to add.

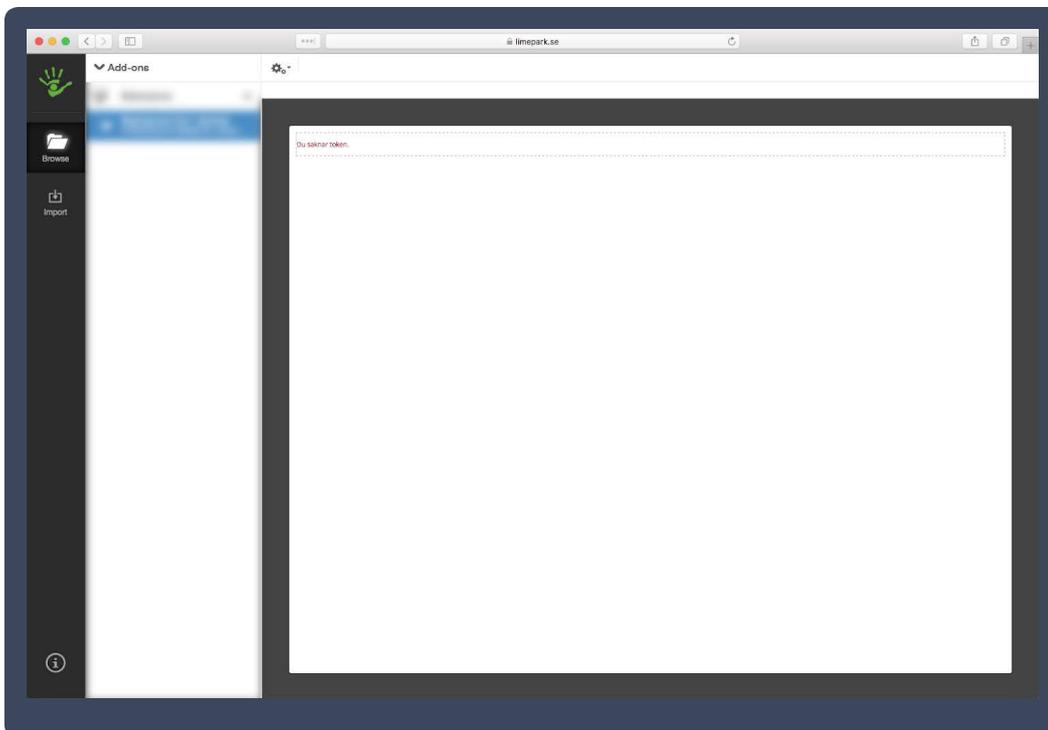

Locate the file “limepark-siteimprove.crt” on your computer and drag it onto the textfield. The textarea should now contain a lot of characters. Press “OK” to save the certificate. Now you should see the certificate “Siteimprove” in your “Trusted publisher certificates”

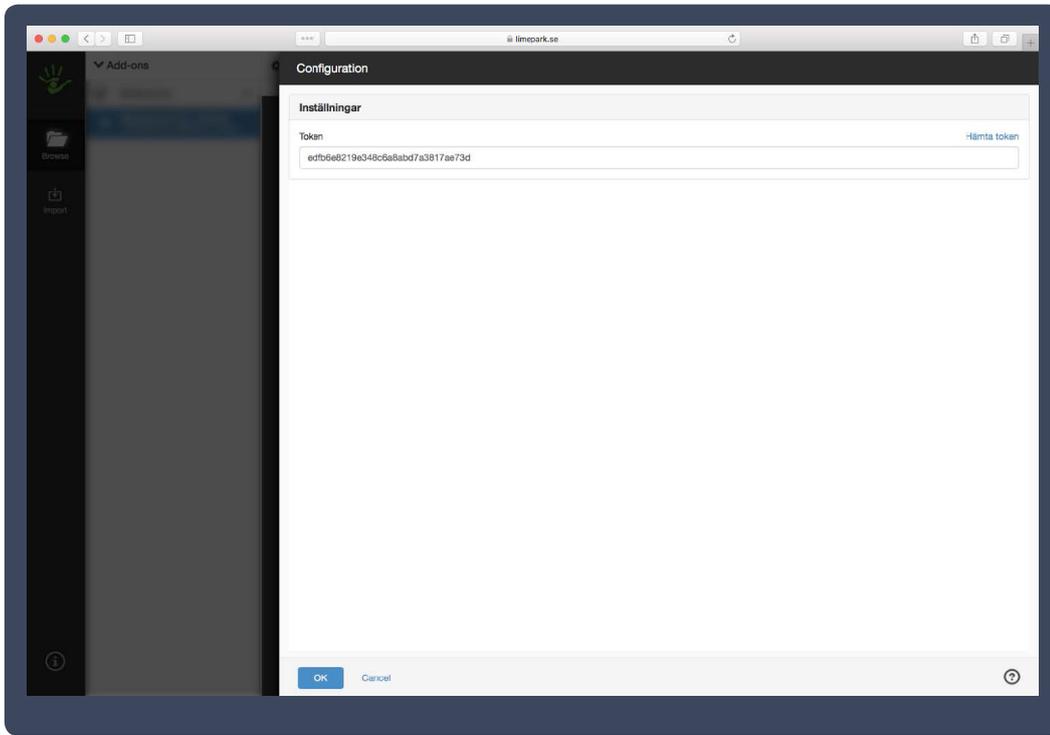

Install Siteimprove addon

When the certificate is successfully installed, go to your sites “Add-ons” repository. Press the button “Import” and locate the file “siteimprove.zip” which contain the plugin. Please name the addon “Siteimprove” and place it in a category, in this guide we use “Other”. Press the button “Import”.

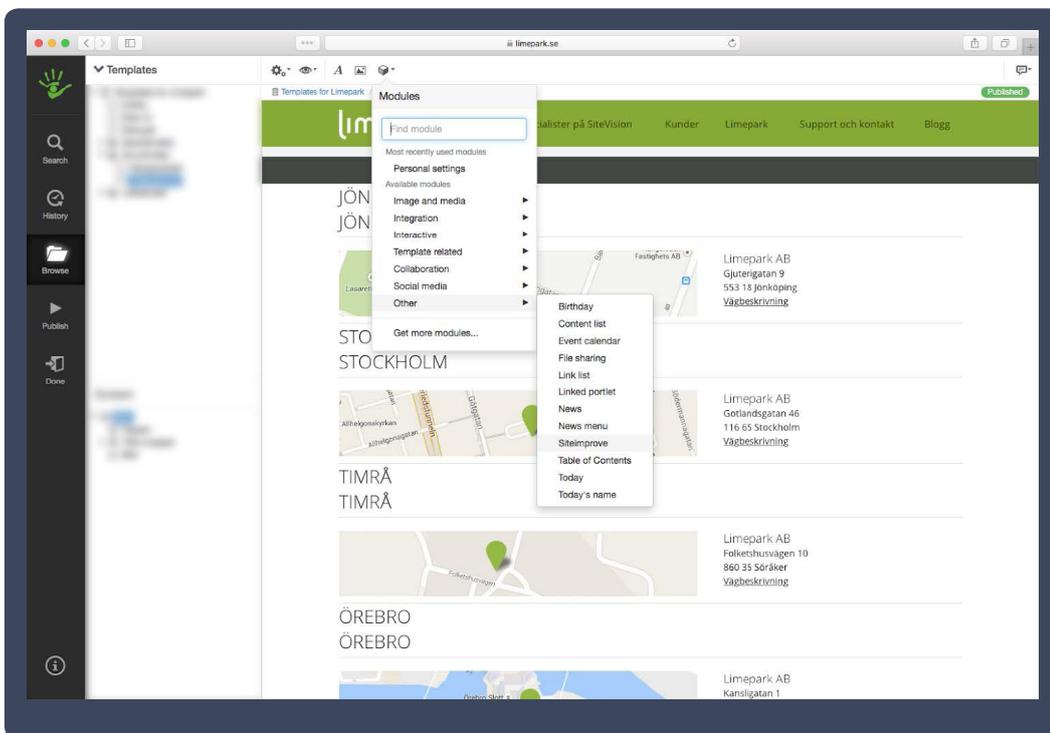

When the plugin is imported, you will see the message “Du saknar token.”. Double click this message to open the plugins settings pane.

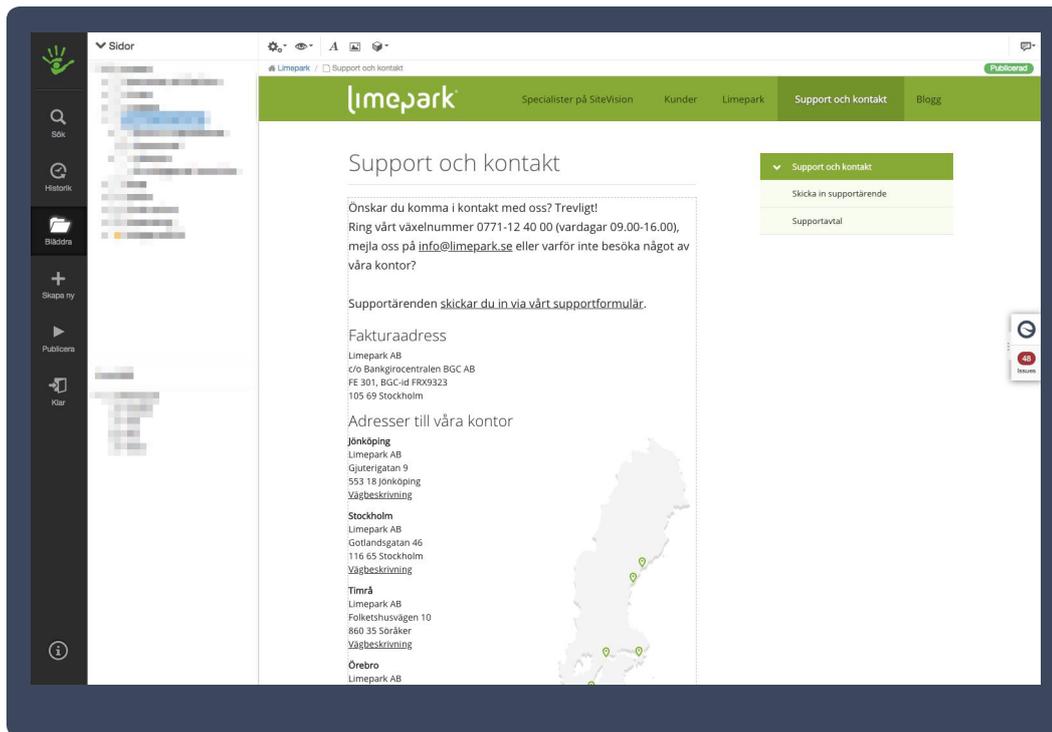

The token field should automatically be filled with a token after a short amount of time, otherwise press the link “Hämta token”. When the token has been successfully fetched, press “OK” to save the token.

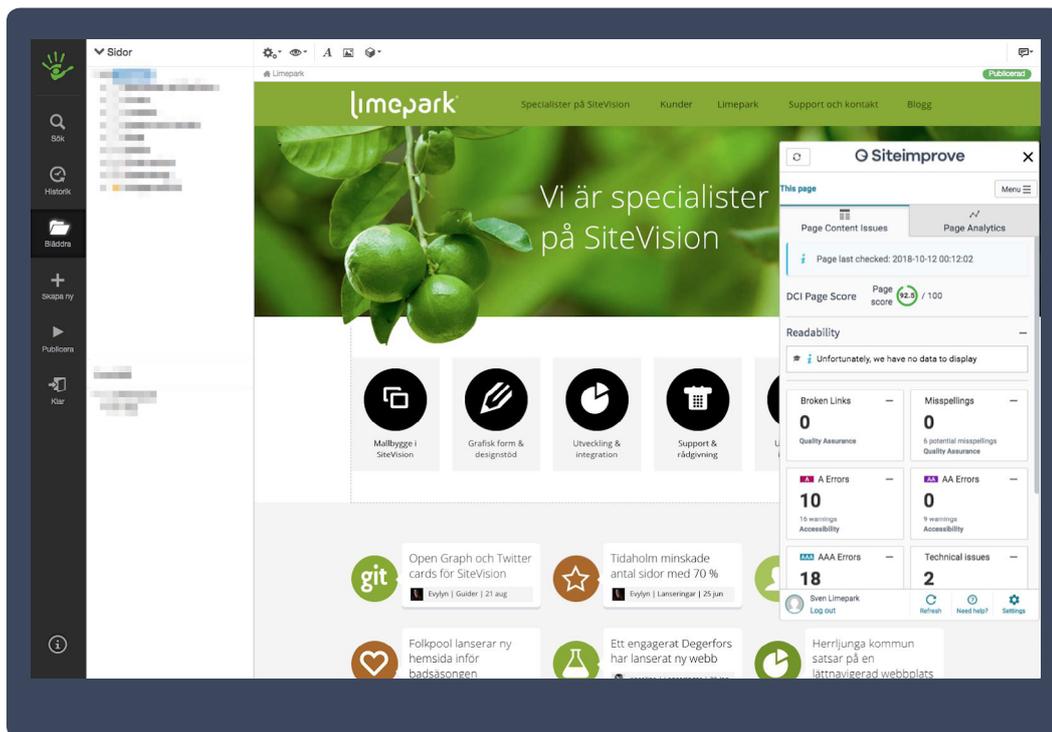

Now you can add the plugin to your base template of your site and then you are done.

Now when you look at your website in edit mode, you will see a small widget at the right side of the screen. Press it to open the full widget.

The opened widget
